Server Installation

Thinking about a NEW machine?

Save time and money

- ✓ We configure new machines and setup for you with Windows Updates and other tweaks to make it run better
- ✓ Using a laptop? Make sure you get one with an SSD Drive and to have a cooling pad with the system
- ✓ Great software you should be using include ESET Antivirus, Malwarebytes Premium, and either Carbonite or iBackup (Which you can go through us for a discount since we are a reseller for all these items)

**Windows 11 is out. If your PC is lower than a 8th Gen CPU – don't update.
Let us be your IT Professional for your Business or Home. Give us a call!**
